

GYNECOLOGICAL SURGERY

**hands-on
training courses**

May 10, 2024

**Laparoscopic Skills Hands-on Course for
Gynecological Surgeon**

**AIMS Academy
Milano
Piazza Ospedale Maggiore, 3**

PROJECT RATIO

This course is aimed at gynecologists interested in deepening their knowledge of minimally invasive surgical treatment for benign gynecological conditions and gynecological neoplasms. The course's objective is to provide a comprehensive understanding of pelvic anatomy and a theoretical-practical update on minimally invasive gynecological surgery, focusing on laparoscopic and hysteroscopic surgery. Special attention will be given to the detailed analysis of the techniques used, the anatomical foundations required for optimal treatment, and the management of complications and adverse events that can occur during surgical procedures. The presentations will be filled with practical advice (tips and tricks). They will aim to provide a standardized approach to patient management from diagnosis to treatment selection and surgery. Each course lasts one day and includes both theoretical and practical sessions. The practical session will be conducted on live-tissue models, where course participants can interact with surgeons and tutors with extensive surgical experience, exchange opinions, share experiences, and clarify doubts.

EVENT VENUE

AIMS Academy

Piazza Ospedale Maggiore, 3

20162 Milano (MI), Italy

AIMS is located inside the Niguarda hospital,
in the north-west part of Milan.

COURSE 1 - May 10, 2024

Laparoscopic Skills Hands-on Course for Gynecological Surgeon

Anatomical landmarks for a precision surgery

FACULTY

Dott. Valerio Gallotta

Dott.ssa Federica Perelli

Dott.ssa Federica Campolo

Dott. Marco Petrillo

Dott. Luigi Della Corte

Dott. Diego Raimondo

Prof. Giuseppe Vizzielli

Dott.ssa Ursula Catena

Dott. Stefano Restaino

Dott.ssa Martina Arcieri

Dott. Salvatore Gueli Alletti

SUBSCRIPTION FEE

Theoretical session and live tissue station:

574€ + 22% VAT (700 € VAT included)

TARGET TRAINEES

The Course's target audience will be clinical fellows and early career surgeons with interest in gynecological pathologies.

LEARNING OBJECTIVES

Overall Course Learning Objectives

At the end of the Course, participants will be able to do:

- Right and Left Hemipelvectomy
- Visualization and Isolation of Arteries and Ureter
- Pelvic Lymphadenectomy
- Visualization of the Aorta and Inferior Vena Cava
- Lombo-Aortic Lymphadenectomy
- Hysterectomy (to be further defined)

COURSE PROGRAM

10:30 AM - 12:30 AM Theory

Anatomy of the Female Pelvis and in Animal Model - *Dott. Raimondo*

Total Hysterectomy in 10 Steps - *Dott.ssa Perelli*

Tips and Tricks for Proper Pelvic and Lombo-Aortic

Lymphadenectomy - *Dott. Gallotta*

Tips and Tricks for Managing Intraoperative Complications -

Dott. Petrillo

Digital Hysteroscopic Clinic: What Changes in the Approach to the Patient - *Dott.ssa Catena*

Introduction of the GESEA Program - *Dott.ssa Campolo*

12:30 PM - 1:30 PM: Lunch

1:30 PM - 5:30 PM: Hands-on Wet Lab (Live Tissue)

Three learners per workstation

Right and Left Hemipelvectomy

Visualization and Isolation of Arteries and Ureter

Pelvic Lymphadenectomy

Visualization of the Aorta and Inferior Vena Cava

Lombo-Aortic Lymphadenectomy

Hysterectomy (to be further defined)
